Connectivity to external trading interfaces

Ecosystem. Platform designed to plug&play.

Match-Trader platform is already integrated with the majority of distribution systems, market-leading CRMs and supporting apps.

The wide range of APIs we provide allows for our clients to easily integrate every application available on the market, in order to create a complete trading ecosystem based on their current setup. Moreover, Brokers can use TradingView integration to access a global audience of 50+ million users.

One Server. Multiple solutions.

Match-Trader platform

Match-Trader is an award-winning trading platform renowned for its mobile-friendly design. Leverage our state-of-the-art back end and carefully crafted trading interface for an unrivalled trading experience.

Back-end Technology

Match-Trader system is also available as a standalone back end technology allowing Brokers to craft their own custom front end. Seamless integration with our matching engine, ensures top-tier performance.

Prop Trading Solution

We offer our clients a comprehensive solution for launching and automating a Prop Trading businesses with a seamless integration with the finest prop trading CRM by FPFEX or an in-house solution.

Get to know our **innovative trading platform.**

This omnichannel trading app adapts to screen resolution. Traders can easily swap between devices as all their settings are synchronised in real-time.

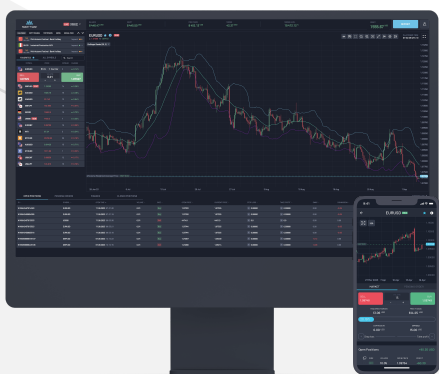

Match-Trader platform is always at hand offering a seamless trading experience with single-sign-on to access all the trading information.

We offer:

- open ecosystem of the platform
- multiple APIs available
- special features for White Labels
- high-processing capacity server
- partnership approach in platform development
- the ability to use your frontend

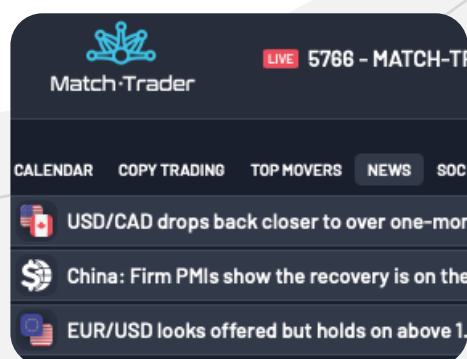

Advanced technology for modern Forex Business.

Match-Trader was developed using **cutting-edge Progressive Web App technology** to give Brokers **the best platform** and guarantee the best trading experience to their clients.

Convenience for traders

The app adapts its interface and features to the device so all user's settings are synchronized across web, mobile and desktop in real-time. It's light-weight so it doesn't take up storage space, therefore it offers high performance even on old generation devices.

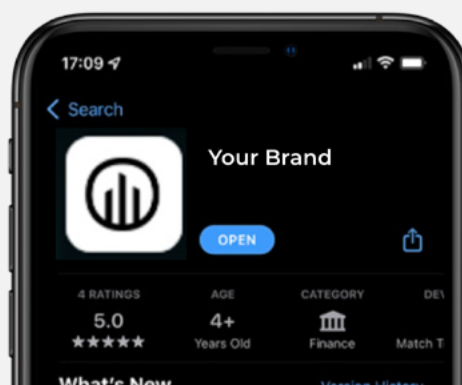

Branding possibilities

Match-Trader offers wide branding possibilities allowing for Brokers to build a strong brand and stand out on the market. The application has a logo and a name chosen by the Broker, in addition, the platform itself allows you to change the colors of some elements.

Hassle-free installation

The user path has been simplified as much as possible to increase the conversion from leads to traders. The app is downloaded and installed directly from the Broker's website, and it can be launched from an icon on the device's home screen.

Mobile apps in app stores

The technology also makes the Match-Trader platform act like a native app so it can be placed in popular app stores. It can significantly increase the number of traders as users in general trust app stores and are more likely to download apps from the store.

Trader-centred design to boost engagement & retention.

All-in-one widget

Everything they need to invest is always at hand, included in the platform. The intuitive interface shows top movers, current market events and calendars (automatically translated by AI).

Social Feed and Copy Trading

Easy access to multiple signal providers. Traders can follow money managers based on their performance statistics or copy single trades to automate their own trading.

Various account types

Let your clients open a new demo or live accounts automatically. With automatic registration clients only have to set their email and password to enter the platform. Additionally, new Guest Mode allows users to explore the platform without the need to create an account at all.

Instant cryptocurrency deposits

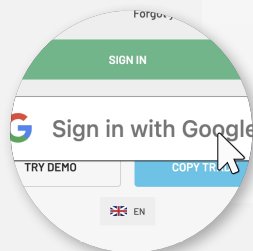

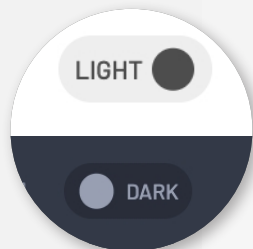

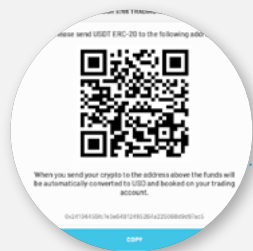

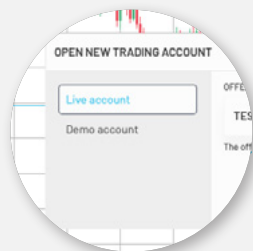

Deposits made using the integrated Crypto Payment Gateway can be automatically booked on clients' trading accounts in just a few minutes without Broker's confirmation.

Multiple platform themes

Customise your platform layout to match your brand and offer your traders multiple skins to choose from (including dark/light mode).

Login via Google

Provide your customers with easy registration and log-in using just their Google account thanks to the integration of the Google Sign-in feature.

Easy IB Network building

Allow traders to earn commissions by becoming Introducing Brokers and expand your network of partners (up to 4 levels structure) to increase traffic on your platform and grow your business. Each IB has access to a dedicated IB Office tab inside the app where he will see all introduced clients.

Multiple languages supported

For customers' convenience they can choose from multiple languages available in the application. New languages are constantly being added.

Multi-chart mode

Enhance workspace personalisation by allowing traders to simultaneously open and manipulate multiple charts on a single browser screen. The Multi-Chart functionality enriches the platform's analytical capabilities, allowing for independently adjusting each displayed chart.

One-click deposit & withdrawals

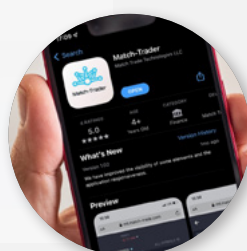

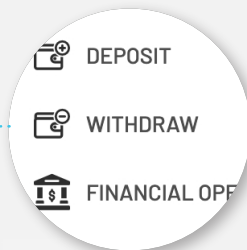

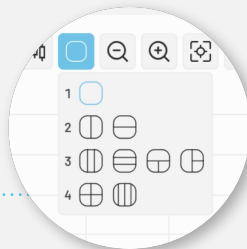

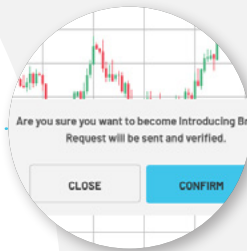

Traders can top up their trading accounts or request withdrawals as well as transfer funds between accounts without leaving the platform.

Available payment methods

Bitcoin, Bank transfer, e-wallet (PayPal, Skrill, Neteller), standard credit cards, credit card to Crypto, Wire to Crypto gateways and over 300 PSPs via Praxis Cashier.

Branded App in app stores

Thanks to the modern technology Match-Trader app can be branded with your Broker's logo and placed in the app stores or simply downloaded from your website. It's light-weight so it will run smoothly regardless of the device, and it supports push notifications both on iOS and Android.

Superb usability to bring the best trading **experience**.

The platform is **very intuitive** and **user-friendly**. It's easy to use for novice users but is also equipped with advanced functionalities to meet the **expectations of experienced traders**.

Intuitive & User-friendly

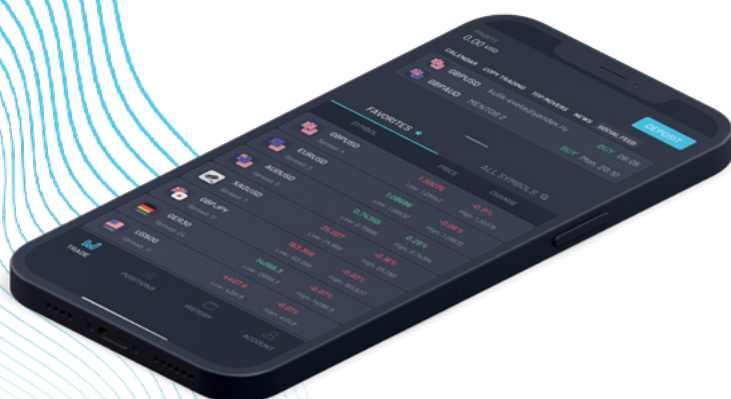

Match-Trader is an award-winning multi-device platform designed to provide the best possible trading experience. The intuitive and user-friendly interface will help you attract more traders.

Economic Calendar & News Feed

The platform aggregates the most important market events along with an assessment of their impact (Economic Calendar News) and also presents instruments with the highest difference in price during the day (Top Movers).

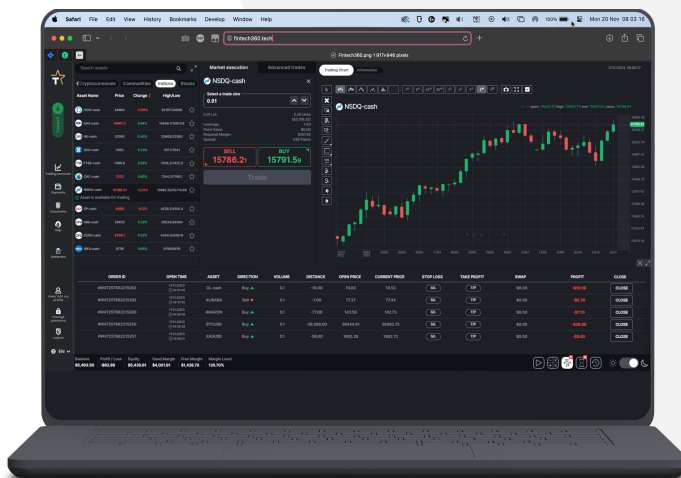

Advanced charts and analytical tools

The variety of indicators available on the platform will make it easier for traders to analyse the market situation and follow trends, making it easier for them to make decisions

Use Match-Trader back-end technology to create your own platform

Our proprietary **back-end technology** is now **available as a standalone solution**. Any Broker interested in building their own platform can streamline the entire process by connecting their custom-made frontend to our proprietary matching engine **proven to support up to 200,000 accounts** without a drop in performance.

Leveraging reliable back-end technology from a trusted partner is the most efficient and cost-effective way for Brokers to build their own platform

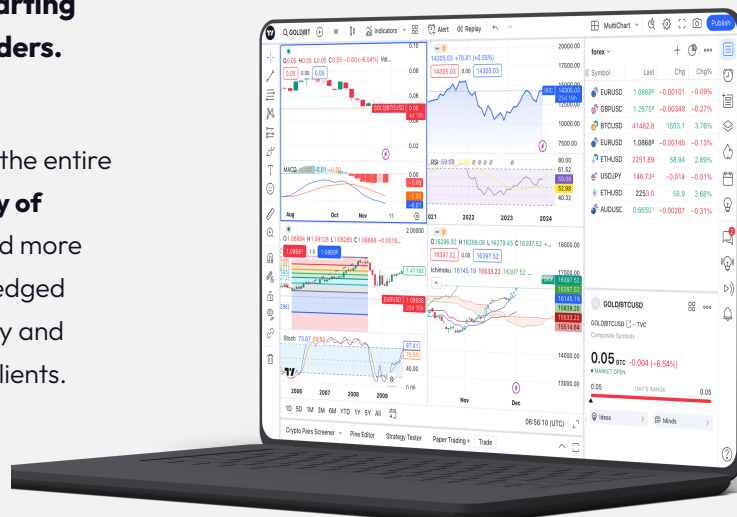

- lower development cost
- faster time-to-market
- reliability and scalability
- more resources for frontend
- no back-end system maintenance
- increased operational efficiency

Get a competitive edge with the **TradingView** integration

Take advantage of a seamless connection to TradingView, the world's famous charting platform used by over 50 million traders.

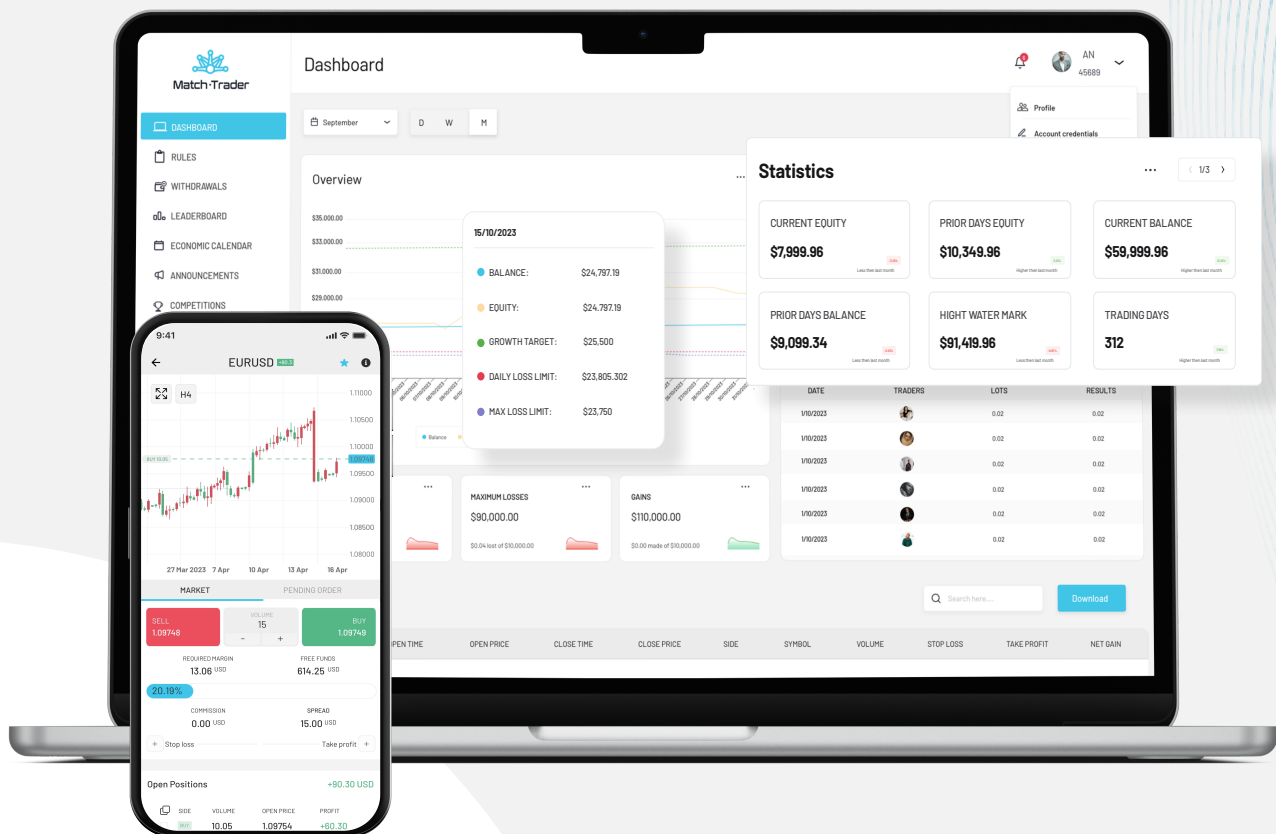

The ready-made integration between Match-Trader back-end technology and the entire TradingView interface, including an **array of charts**, over **100 technical indicators** and more than **90 drawing tools**, provides a full-fledged trading solution that guarantees reliability and diversity of trading experience for your clients.
