Match-Trade Technologies is a fully integrated forex and cryptocurrency technology provider and creator of the award-winning Match-Trader platform.

We have operated in a global market since 2013. With our offices in Cyprus, Poland, South Korea, Malaysia, India

and USA, we offer our services to clients and partners worldwide.

Our offering comprises the platform server with multiple APIs allowing to fit Match-Trader into any existing ecosystem and all-inclusive White Labels with Client Office for Traders, Forex CRM for Brokers, and

Match2Pay, a block chain-based Crypto Payment Gateway.

Our strategic partnership with Match-Prime Liquidity Provider regulated by CySEC enables our clients to access deep liquidity across multi-asset instruments.

## Match-Trader Platform. **Milestones.**

**2013**

Started developing our own Match-Trade system

**2020**

Launch of Match-Trader platform for Retail Brokers

**2022**

Server Licence Launch

# Ecosystem. Platform designed to plug&play.

**Match-Trader platform is already integrated with the majority of distribution systems, market-leading CRMs and supporting apps.**

**The wide range of APIs we provide allows our clients to easily integrate every application available on the market to create a complete trading ecosystem based on their current setup.**

## High-end platform for **White Label Providers**.

### **Server License for providing White Labels**

We have prepared a special offer for White Label providers based on our own experience selling over 500 White Labels on 3 platforms

### **Open Ecosystem of the Match-Trader platform**

We encourage software developers and technology providers to participate in creating an ecosystem around the Match-Trader platform

### **Special features for WL Brokers' convenience**

Individual sets of symbols without suffixes; charts showing prices as they appear in the Market Watch, including markups; the end-of-day time that can be set according to the broker's time zone.

# Get to know our **innovative trading platform.**

This omnichannel trading app adapts to screen resolution. Traders can easily swap between devices as all their settings are synchronised in real-time.

**Match-Trader platform is always at hand offering a seamless trading experience with single-sign-on to access all the trading information.**

## **We offer:**

- open ecosystem of the platform
- multiple APIs available
- special features for White Labels
- high-processing capacity server
- partnership approach in platform development

# Advanced technology for modern Forex Business.

Match-Trader was developed using **cutting-edge Progressive Web App technology** to give Brokers **the best platform** and guarantee the best trading experience to their clients.

## Convenience for traders

The app adapts its interface and features to the device so all user's settings are synchronized across web, mobile and desktop in real-time. It's light-weight so it doesn't take up storage space, therefore it offers high performance even on old generation devices.

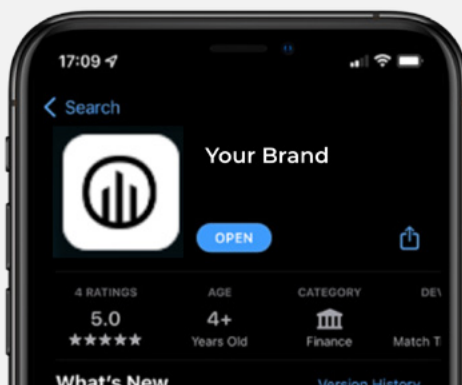

## Branding possibilities

Match-Trader offers wide branding possibilities allowing Brokers to build a strong brand and stand out on the market. The application has a logo and a name chosen by the Broker, in addition, the platform itself allows you to change the colors of some elements.

## Hassle-free installation

The user path has been simplified as much as possible to increase the conversion from leads to traders. The app is downloaded and installed directly from the Broker's website, and it can be launched from an icon on the device's home screen.

## Mobile apps in app stores

The technology also makes the Match-Trader platform act like a native app so it can be placed in popular app stores. It can significantly increase the number of traders as users in general trust app stores and are more likely to download apps from the store.

# Trader-centred design to boost engagement & retention.

Give your clients an intuitive and user-friendly interface to ensure a smooth flow of trades. Increased engagement will help improve client retention.

## All-in-one widget

Everything they need to invest is always at hand, included in the platform to guarantee a smooth flow of trades. The intuitive interface shows current market events, top movers and the possibility of automatic trading.

## Social Feed and Copy Trading

Easy access to multiple signal providers. Each trader can follow chosen money managers based on their performance statistics or simply copy single trades to automate their own trading.

## Open demo/live account

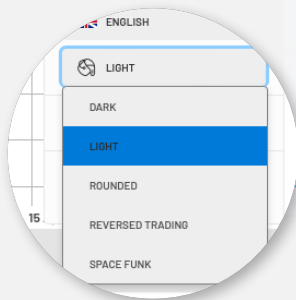

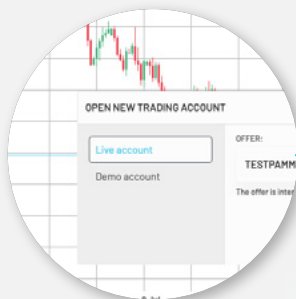

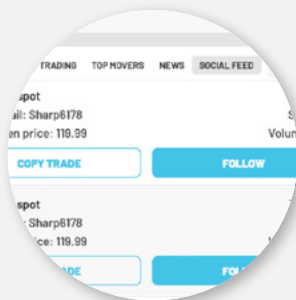

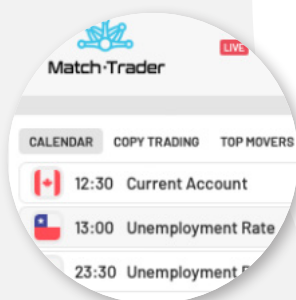

Let your clients open a new demo or live accounts automatically. With automatic registration clients only have to set their email and password to enter the platform.

## Instant cryptocurrency deposits

Deposits made using the integrated Crypto Payment Gateway can be automatically booked on clients' trading accounts in just a few minutes without Broker's confirmation.

## Multiple platform themes

Customise your platform layout to match your brand and offer your traders multiple skins to choose from (including dark/light mode).

## Easy IB Network building

Allow traders to earn commissions by becoming Introducing Brokers and expand your network of partners (up to 4 levels structure) to increase traffic on your platform and grow your business. Each IB has access to a dedicated IB Office tab inside the app where he will see all introduced clients.

## Multiple languages supported

For customers' convenience they can choose from multiple languages available in the application. New languages are constantly being added.

## One-click deposit & withdrawals

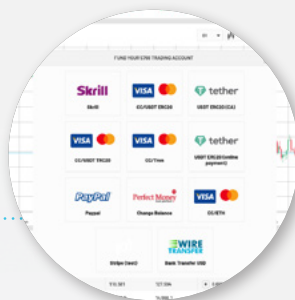

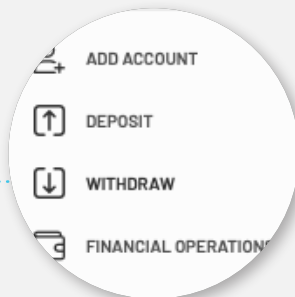

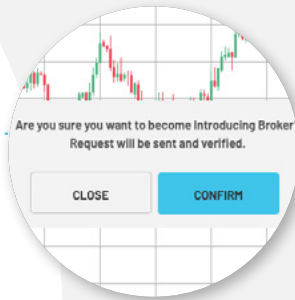

Traders can top up their trading accounts or request withdrawals as well as transfer funds between accounts without leaving the platform.

## Available payment methods

Bitcoin, Bank transfer, e-wallet (PayPal, Skrill, Neteller), standard credit cards, credit card to Crypto, Wire to Crypto gateways and over 300 PSPs via Praxis Cashier.

## Branded App in app stores

Thanks to the modern technology Match-Trader app can be branded with your Broker's logo and placed in the app stores or simply downloaded from your website. It's light-weight so it will run smoothly regardless of the device.

# Superb usability to bring the best trading **experience**.

The platform is **very intuitive** and **user-friendly**. It's easy to use for novice users but is also equipped with advanced functionalities to meet the **expectations of experienced traders**.

## Intuitive & User-friendly

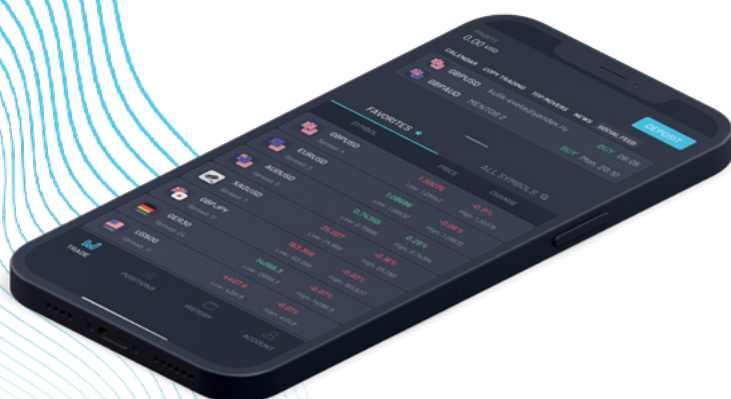

Match-Trader is an award-winning multi-device platform designed to provide the best possible trading experience. The intuitive and user-friendly interface will help you attract more traders.

## Economic Calendar & News Feed

The platform aggregates the most important market events along with an assessment of their impact (Economic Calendar News) and also presents instruments with the highest difference in price during the day (Top Movers).

## Advanced charts and analytical tools

The variety of indicators available on the platform will make it easier for traders to analyse the market situation and follow trends, making it easier for them to make decisions

# Take advantage of your own Match-Trader server.

## Fully hosted solution

Match-Trader servers are hosted on the Azure or AWS cloud for stability and maximal performance and can be installed worldwide. Each broker gets safe access to an isolated server.

## High processing capacity server

The Match-Trader platform is offered with high capacity server to guarantee maximum processing efficiency, that we have confirmed by having 100k accounts on our own server.

## Private client database

Broker maintain full control and exclusive access to their client database, which remains installed on the client's account in the indicated location to guarantee maximum security.

## Multiple APIs available

Match-Trader System provides an open trading environment accessible via various APIs to enable smooth integration with Broker's own system and improve the work of the dealing team.

## Live support

We offer constant technical support for our solutions as well as help and guidance in setting platform parameters. Our support team is available to Brokers via multiple messengers.

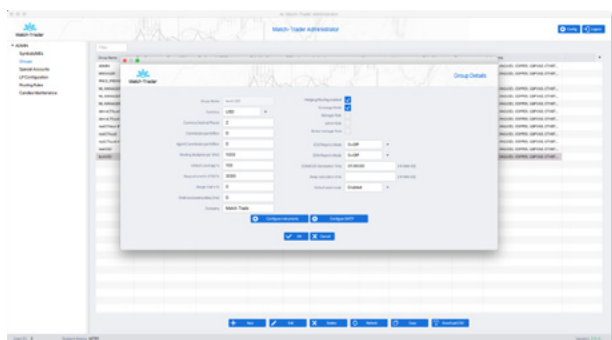

## No turnover fee

Clients are charged a fixed fee for Real Active Accounts. There's no B-Book turnover or deposit fee, and the platform setup is also free. Brokers pay for the resources they actually use.

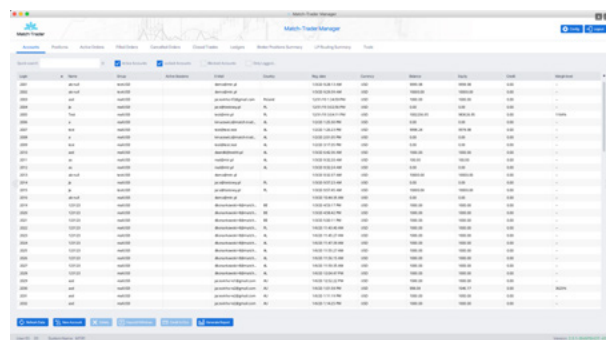

# Applications **for Brokers.**

Match-Trader offers wide range of back office applications allowing every broker to make modifications whenever they feel the need and manage the entire system on their own.

## **Admin Application with Routing Engine**

Admin app gives the authority to control the whole trading environment. Admins can create and configure instruments, create/edit managers, configure Data Feeds / LP connections or manage charts.

## **Manager With API**

Manager's API allows brokers to manage all of the clients' activities and accounts in one place, including deposits and withdrawals and enables accessing various reports. It helps streamline the work of the dealing desk by closer integration with the Match-Trader system.

## **Various APIs**

Match-Trader System provides an open trading environment accessible via various APIs. The APIs we provide allow our clients to easily integrate every application available on the market to create a complete trading ecosystem based on their current setup.

## **SQL Reporting Server**

Our platform entails functionalities of a SQL Reporting Server, thanks to which a variety of reports can be prepared (both printed and interactive), making Business Intelligence more effective and efficient.
